Washable and reusable up to 50 times

Washing instructions

We recommend to wash the mask on first use.

Domestic washing up to 60°C. It is recommended to rinse well to remove residues of cleaning agents.

Tumble drying is permitted.

Ironing (150°C) is required to re-activate the water-repellent characteristics.

Instructions for use

Wash your hands accurately before putting on/ taking off the mask.

Wear the mask as indicated (external side).

Extend the mask until it covers your mouth and nose and tie it firmly behind your head.

Never touch the mask with dirty hands, take it only by the laces.

When not worn, it must be carefully stored in a clean place; it doesn't have to be placed on uncleaned or non-sanitized surfaces.

To sanitize it quickly during the day, spray alcohol on the two faces and let it act for at least one minute.

After you take it off, waiting to be washed. wrap it in a paper or plastic bag to avoid contact with clothing or anything else.
